Reprogenetics™ Recombine™ Genesis Genetics™

Consumables for Day 5 Biopsy

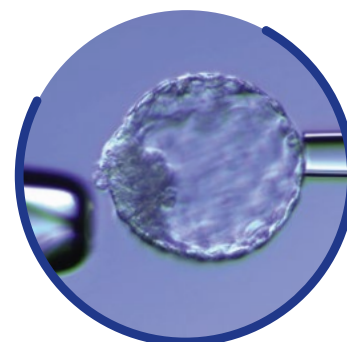

Choose from a range of high quality media to support and protect the embryo during biopsy, and our biopsy and holding micropipettes to help facilitate easier procedures. We provide handling tips for embryos and biopsied cells and offer hands-on training courses for improving biopsy techniques and use of laser for assisted hatching.

Product	Recommended Product	Order Code
Holding Media	Quinn's Advantage™ Medium with HEPES	ART-1023

Committed to every aspect of embryo biopsy and testing

The CooperSurgical fertility companies and CooperGenomics are comprised of global leaders in IVF and reproductive genetics. Our experience working with embryologists in laboratories across the globe, and offering a portfolio of products for the entire ART process, means we can help simplify biopsy work within your laboratory. Working in this way helps achieve consistent results and increase the likelihood of success.
