Equipment for Micromanipulation – Superior Kit

Our high quality and innovative micromanipulator and laser have been specifically designed for ART. The Integra 3™ provides a heated environment for oocytes and embryos during micromanipulation and we offer training sessions that enable you to get hands-on with all our superior kits.

| | Saturn 5 Active 20x Objective (Olympus IX73) | 6-47-500-06 |
| Stereomicroscope | Nikon SMZ1270 | 17-358 |
| | Olympus SZX7 | XNOR-02183 |
| Workstation | L124 IVF ICSI | 4.141.142.314 |
| Training Courses | Introduction to ICSI Biopsy Techniques | See www.origio.com/traininglab for availability |

Committed to every aspect of micromanipulation

The CooperSurgical family of fertility companies is comprised of global leaders in IVF and reproductive genetics. Our experience working with embryologists in laboratories across the globe, and offering a portfolio of products for the entire ART process, means we can help simplify ICSI and biopsy work within your laboratory. Working in this way helps increase the likelihood of success and achieve consistent results.
